

Erythromycin A oxime

Code No.: **BIA-E1381**

Pack sizes: **5 mg, 25 mg**

Synonyms :

Specifications

CAS #	: 111321-02-9
Molecular Formula	: C ₃₇ H ₆₈ N ₂ O ₁₃
Molecular Weight	: 749.0
Source	: Semi-synthetic
Appearance	: White solid
Purity	: >98% by HPLC
Long Term Storage	: -20°C
Solubility	: Soluble in ethanol, methanol, DMF or DMSO. Good water solubility.

Application Notes

Erythromycin A 9-oxime is a semi-synthetic analogue of erythromycin prepared as means of overcoming acid lability and improving oral absorption of erythromycin A while retaining comparable antibacterial potency. Although not developed as a commercial product, erythromycin oxime was pivotal in the development of the ring expanded aza-erythromycins (e.g. azithromycin) and the oxime ethers (e.g. roxithromycin).
