

Avermectin B1a

Code No.: **BIA-A1010**

Pack sizes: **5 mg, 25 mg**

Synonyms : 5-O-Demethylavermectin A1a, C 076B1a

Specifications

| | |
|-------------------|--|
| CAS # | : 65195-55-3 |
| Molecular Formula | : C₄₈H₇₂O₁₄ |
| Molecular Weight | : 873.1 |
| Source | : <i>Streptomyces avermitilis</i> |
| Appearance | : White solid |
| Purity | : >99% by HPLC |
| Long Term Storage | : -20°C |
| Solubility | : Soluble in ethanol, methanol, DMF or DMSO. Poor water solubility. |

Application Notes

Avermectin B1a is the major component (>80%) of a commercially available anthelmintic used to control parasitic nematodes in livestock. Avermectin B1a contains a sec-butyl residue in the 25-position. In vitro and in vivo studies have shown that this analogue is the more potent analogue in the commercial product.
