

Beauveriolide III

Code No.: **BIA-B2295**

Pack sizes: **0.5 mg, 2.5 mg**

Synonyms : FO 6979

Specifications

CAS #	: 221111-70-2
Molecular Formula	: C ₂₇ H ₄₁ N ₃ O ₅
Molecular Weight	: 487.63
Source	: <i>Beauveria bassiana</i>
Appearance	: White solid
Purity	: >95% by HPLC
Long Term Storage	: -20°C
Solubility	: Soluble in methanol or DMSO

Application Notes

Beauveriolides are 13-membered cyclodepsipeptides isolated from *Beauveria* sp. Beauveriolide III inhibits acyl-CoA:cholesterol acyltransferase (ACAT) to block the synthesis of cholesteryl ester, leading to a reduction of lipid droplets in macrophages. Beauveriolide III is more potent against ACAT1 than ACAT2 (IC₅₀ 5.5 vs. > 20 μM, respectively). Beauveriolide III is antiatherogenic activity in mouse models.
