

## PRODUCT DATA SHEET

Code No.: BIA-C1415

Pack sizes: 5 mg, 25 mg

Synonyms

Actidione, Naramycin, U 4527, NSC 185

## Specifications

Cycloheximide

CAS #	:	66-81-9
Molecular Formula	:	C <sub>15</sub> H <sub>23</sub> NO <sub>4</sub>
Molecular Weight	:	281.4
Source	:	Streptomyces sp.
Appearance	:	White solid
Purity	:	>95% by HPLC
Long Term Storage	:	-20°C
Solubility	:	Soluble in ethanol, methanol, DMF or DMSO. Poor water solubility.

## **Application Notes**

Cycloheximide is the most recognised member of the glutarimide microbial metabolites. Cycloheximide was isolated from Streptomyces griseus in the late 1940s as a potent and broad spectrum antifungal. Cycloheximide inhibits protein synthesis by interfering with translocation. Cycloheximide is an established bioprobe and widely-used antifungal reagent in research with over 25,000 literature citations.
