

DL-2,6-Diaminopimelic acid

Code No.: **BIA-D2434**

Pack sizes: **5 mg, 25 mg**

Synonyms

: rel-(2R,6R)-2,6-Diaminoheptanedioic acid, (\pm)-Diaminopimelic acid, (\pm)- α,ϵ -Diaminopimelic acid, DL-2,6-Diaminopimelic acid, DL- α,ϵ -Diaminopimelic acid

Specifications

CAS #	2577-62-0
Molecular Formula	C₇H₁₄N₂O₄
Molecular Weight	190.2
Source	Synthetic
Appearance	White solid
Purity	>95% by HPLC
Long Term Storage	-20°C
Solubility	Soluble in methanol or DMSO

Application Notes

DL-Diaminopimelic acid is a stereoisomer of mesodiaminopimelic acid, a constituent of the peptidoglycans present in the cell walls of algae and most bacteria. DL-Diaminopimelic acid is found in the cell wall of some actinomycetes, including Nocardia. DL-Diaminopimelic acid can be used as a marker of microbial nitrogen in sheep and other ruminants.
