

## Spinosyn D aglycone

Code No.: **BIA-S1596**

Pack sizes: **0.5 mg, 2.5 mg**

Synonyms :

### Specifications

CAS #	:	<b>149439-79-2</b>
Molecular Formula	:	<b>C<sub>25</sub>H<sub>36</sub>O<sub>5</sub></b>
Molecular Weight	:	<b>416.6</b>
Source	:	<b>Semi-synthetic</b>
Appearance	:	<b>White solid</b>
Purity	:	<b>&gt;95% by HPLC</b>
Long Term Storage	:	<b>-20°C</b>
Solubility	:	<b>Soluble in ethanol, methanol, DMF or DMSO.</b>

### Application Notes

Spinosyn D aglycone is an acid degradation product produced by hydrolysis of both saccharide groups on spinosyn D, the minor component of the commercial insecticide, Spinosad. Spinosyn D aglycone is only weakly active as an insecticide as the saccharides are considered essential for potent activity. Despite the importance of spinosyns as agro-chemical insecticides and more recently as animal health products, there are few published reports of the biological activity or the levels of spinosyn D aglycone in animals or in the environment.
