

Code No.: BIA-A2440

## Apramycin

Pack sizes.: 5mg, 25mg

### Synonyms:

Ambylan, , Apralan, Apralin, EL 857, EL 857/820, Nebramycin II, Nebramycin factor 2

## Specifications

|                   |  |
|-------------------|--|
| CAS #             | <b>: 37321-09-8</b>  |
| Molecular Formula | <b>: C<sub>21</sub>H<sub>41</sub>N<sub>5</sub>O<sub>11</sub></b> |
| Molecular Weight  | <b>: 539.58</b>  |
| Source            | <b>: -</b>   |
| Appearance        | <b>: Light yellow solid</b>                                      |
| Purity            | <b>: &gt;95% by HPLC</b>   |
| Long Term Storage | <b>: -20°C</b>   |
| Solubility        | <b>: Soluble in methanol or DMSO</b>                             |

## Application Notes

Apramycin is a structurally unique broad spectrum aminoglycoside antibiotic that contains a bicyclic sugar moiety and a monosubstituted deoxystreptamine active. Apramycin inhibits the translocation step of bacterial protein synthesis and induces translation errors. Apramycin is marketed for veterinary use against Gram negative bacteria. Resistance to apramycin is conferred by production of ribosomal acetyltransferase.
