

Agaric acid

Code No.: BIA-A2596

Pack sizes.: 25mg, 100mg

Synonyms:

Agaricic acid, Agaricin, Agarinic acid, Laricic acid, NSC 60429, NSC 65690, α -Cetylctic acid

Specifications

CAS #	: 666-99-9
Molecular Formula	: C₂₂H₄₀O₇
Molecular Weight	: 416.55
Source	: -
Appearance	: White solid
Purity	: >95% by HPLC
Long Term Storage	: -20°C
Solubility	: Soluble in methanol or DMSO

Application Notes

Agaric acid is an adenine nucleotide translocase antagonist which induces mitochondrial permeability, promoting efflux of accumulated Ca²⁺, collapse of transmembrane potential, and mitochondrial swelling. Agaric acid has been used historically to inhibit sweating. Agaric acid inhibits both motility and biofilm formation in *Salmonella Typhimurium*.
