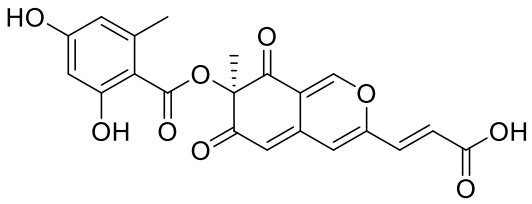
PRODUCT DATA SHEET

Mitorubrinic acid

Code No.: **BIA-M2969**

Pack sizes: **1 mg, 5 mg**



Synonyms : -

Specifications

CAS #	:	**58958-07-9**
Molecular Formula	:	**$C_{21}H_{16}O_9$**
Molecular Weight	:	**412.4**
Source	:	***Talaromyces* sp.**
Appearance	:	**Orange solid**
Purity	:	**>95% by HPLC**
Long Term Storage	:	**-20°C**
Solubility	:	**Soluble in methanol, DMSO.**

Application Notes

Mitorubrinic acid was isolated from the phytotoxic fungus, Penicillium funiculosum. Mitorubrinic acid was patented in Japan in 1996 as a dihydrofolate reductase inhibitor for the treatment of protozoal diseases. Mitorubrinic acid shows weak inhibitory activity against Plasmodium falciparum dihydroorotate dehydrogenase (PfDHODH). Mitorubrinic acid inhibits trypsin with an IC50 41 µmol/l.
